

SQDC

Stainless Steel Quick Disconnect

- Quick and reliable method a making a number of pneumatic connections.
- 8, 16, 24 and 32 port stainless steel quick disconnects.
- Available with 1/16" and 0.040" (1mm) compression fittings and bulged tubulations.
- Available with Silicone and FFKM 'O' rings.
- Fitted with locking device for vibration resistance (tested to D0160F)
- Male and female blanks and pipe-work guides available.
- Temperature range of -55 to 325°C

The SQDC couplings are a long established range of high-temperature quick disconnects suitable for use in a range of harsh environments. The SQDC's allow for quick and simple connection if multiple pneumatic lines primarily designed for pressure instrumentation.

The SQDC has been specifically designed, and extensively tested, to perform in high temperature / high vibration environments.

The SQDC's are constructed from stainless steel and feature 1/16" and 0.040" (1mm) compression fittings (with double ferrules) for direct and reliable connection to stainless steel tubing. The SQDC range can also be ordered with bulged tubulations for flexible tube (either 1.0 or 1.6mm i/d) and can also act as an adapter between each type.

The SQDC is available with two different seal types, FFKM or silicone which have different temperature performances (see specification table). The SQDC is also fitted with an anti-vibration features - either a CAN lock or wire-locking features.

The SQDC range is extensive. It can be ordered for 8, 16, 24 or 32 ways with blanks of either gender available. There are two seal configurations and a range of accessories to complete the range.

The SQDC range compliments Chell's other pneumatic connector series such as the AQDC, AQDC-HD, Cablerange AS and Circlex connectors.

SQDC Specifications**Options**

Number of ports	8, 16, 24 and 32
Fitting types	Double ferrule compression fitting for 1/16 inch and 0.040" inch (1mm) stainless steel tubing or bulged tubulations (1.0 and 1.6mm) for flexible tubing.
Seal type	Silicone (S70X), FFKM (G75B)

Pressure Performance

Pressure	All SQDC components are tested to a pressure of 70 bar (1015 psi) at 20°C. Please see temperature section for pressure limits at high / low temperatures. All the SQDC components have been tested to these pressures with a leak rate no greater than 9×10^{-3} mbar x l/s.
Vacuum	All SQDC components are tested to a vacuum of 8×10^{-3} mbar at 20°C. Please see temperature section for pressure limits at high / low temperatures. All the SQDC components have been tested to this vacuum level with a leak rate no greater than 9×10^{-8} mbar x l/s.

Temperature Performance

The SQDC has been thoroughly tested through its temperature range. This tests were performed at 60 Bar (870 psi) and vacuum ($<8 \times 10^{-3}$ mbar). The results for the different seal / fitting types are as follows:

FFKM Seals / Compression Fittings

	Minimum Temperature	Maximum Temperature
Pressure (60 bar)	-20°C	325°C Max, working temperature 280°C
Vacuum ($<8 \times 10^{-3}$ mbar)	-40°C	325°C Max, working temperature 280°C

Silicone Seals / Compression Fittings

	Minimum Temperature	Maximum Temperature
Pressure (60 bar)	-55°C	250°C Max, working temperature 200°C
Vacuum ($<8 \times 10^{-3}$ mbar)	-55°C	250°C Max, working temperature 200°C

Bulged Tubulations (All Seals)

	Minimum Temperature	Maximum Temperature
Pressure (60 bar)	-55°C	80°C
Vacuum ($<8 \times 10^{-3}$ mbar)	-55°C	80°C

NOTE (1) : After prolonged use at high temperature, the seals may require replacement when the SQDC is separated.

Vibration Performance

Tested for vibration to EUROCAE ED-14E Section 8 wrt D0160F

Material

SQDC	All Stainless steel 316 with the exception of the anti-vibration locking cam which is Phosphor Bronze. The SQDC nut is silver plated to prevent any fauling of the thread.
Pipe-work guide and aluminium blank	NS4 Anodised aluminium

SQDC Part Number

SQDC-A-NN-BC-D-EF-G-H

A = Seal Configuration

R = Reversed (seals in removable half)

NN= Number of ways

8, 16, 24 and 32

B = Bulkhead Half Configuration

0 = Not present

1 = 1/16" with no fittings

2 = 1/16" complete with Gyrolok® double ferrule and compression nut

3 = 1mm bulged tubulation

4 = 1.5mm bulged tubulation

5 = Blank (mates with removable half), stainless steel, all ports sealed

6 = Plastic cap (mates with removable half).

7 = 0.040" (1mm) double ferrule and compression nut

D = Bulkhead to bulkhead connector

C = Removable Half Configuration

0 = Not present

1 = 1/16" with no fittings

2 = 1/16" complete with Gyrolok® double ferrule and compression nut

3 = 1mm bulged tubulation

4 = 1.5mm bulged tubulation

5 = Blank (mates with bulkhead half), stainless steel, all ports sealed

6 = Cap (mates with bulkhead half), anodised aluminium overall seal with Perlast® fluid seal

7 = 0.040" (1mm) double ferrule and compression nut

8 = Plastic cap (mates with bulkhead half)

D = Seal Type

S = Silicone (S70X) seals

P = Perlast® seals

SF = Silicone seals (S70X) with incorporated Perlast® fluid seal to keep contaminants from silicon seal

Pipe-work Guides

E = Bulkhead Half Pipe-work guide

9 = Not present

0 = Straight

1 = 45 Degree

2 = 90 Degree

3 = Omit pipe-work guide retention feature (bulkhead half only)

F = Removable Half Pipe-work guide

9 = Not present

0 = Straight

1 = 45 Degree

2 = 90 Degree

G = Bulkhead Mounting Options (bulkhead half only)

0 = 3.2mm diameter mounting hole

1 = 4-40 UNC locking thread insert.

H = Locking Feature (removable half only)

1 = Rotating CAM (standard)

2 = Wire lock features

3 = Thread locking screw (AQDC Only)

SQDC Accessories

SQDC Tools

SQDC-701039	Tubing spanner for compression fittings and anti-vibration cam (6", 150mm)
SQDC-701574	Tubing spanner for compression fittings and anti-vibration cam (3", 75mm)
SQDC-704039	Crow foot spanner for main nut - 8 way SQDC
SQDC-701317	Crow foot spanner for main nut - 16 way SQDC
SQDC-702658	Crow foot spanner for main nut - 24 way SQDC
SQDC-701339	Crow foot spanner for main nut - 32 way SQDC
STP2	Tubing pliers for use with bulged tubulations

Spare Compression Fittings (for 1/16" - 1.6mm tubing)

SQDC-800506	Compression double ferrule pair (Gyrolok®)
SQDC-701024	Compression nuts
SQDC-701059	Compression fitting blank

Spare Compression Fittings (for 0.040" - 1mm tubing)

SQDC-801266	Compression double ferrule pair 1mm
SQDC-701265	Compression nuts 1mm

Bulged Tubulation Fittings

12-90-2540	Retention springs for 1.0mm i/d tubing
12-90-2562	Retention springs for 1.5mm i/d tubing

Spare Seals

SQDC-540196	FFKM 'O' rings (each)
SQDC-540201	Silicone 'O' rings (each)
SQDC-540212	FFKM 'O' rings for fluid seal (SF)

Example SQDC Ordering Codes

SQDC-R-32-77-S-99-0-1
32 way SQDC for 1mm SS tubing with silicone seals, 3.2mm mounting holes and CAM lock main nut.

SQDC-R-16-22-P-99-0-1
16 way SQDC for 1/16" SS tubing with FFKM seals, 3.2mm mounting holes and CAM lock main nut.

SQDC-R-8-77-S-99-1-1
8 way SQDC for 1mm SS tubing with silicone seals, 4-40 locking thread inserts and CAM lock main nut.

SQDC Dimensions

SQDC 8 way 0.04" (1mm) pair (SQDC-R-8-77)

SQDC 16 way 1/16" pair (SQDC-R-16-22)

SQDC 24 way 0.04" (1mm) pair (SQDC-R-24-77)

SQDC 32 way 0.04" (1mm) pair (SQDC-R-32-77)

Pipe-work Guides

SQDC 8 way

Stand alone part number | SQDC-PW-8-0

| SQDC-PW-8-1

| SQDC-PW-8-2

SQDC 16 way

Stand alone part number | SQDC-PW-16-0

| SQDC-PW-16-1

| SQDC-PW-16-2

SQDC 32 way

Stand alone part number | SQDC-PW-32-0

| SQDC-PW-32-1

| SQDC-PW-32-2

Example SQDC Order Codes

SQDC Looms

Chell can provide a range of looms combining the SQDC range our other range of fittings such as the AS quick-disconnect shown here. All looms are supplied tested and leak checked.

SQDC Compatible Tubing Sizes	
1/16" Compression Fittings	
Stainless Steel	Wall thickness 0.25 to 0.5mm, o/d 1.6mm, i/d 0.6 to 1.1mm
Nimonic 75	Wall thickness 0.25 to 0.5mm, o/d 1.6mm, i/d 0.6 to 1.1mm
Bulged Tubulations	
1.0 mm	Nylon and polyurethane, o/d 1.8mm ¹ , i/d 1.0mm
1.6 mm	Nylon and polyurethane, o/d 2.3 to 2.4mm ¹ , i/d 1.6mm
NOTE (1) : The o/d is only a consideration if retention springs are used.
